THE AMAZING ANIMALS OF ATLANTIS

© BY 2C

UNICORN

The Unicorn was a kind of horse. It lived in the magical wood. It was as big as a horse and it was very shy. It had a very pretty horn and a pink tail. In the year 800 before Christ the Unicorn died out but the Unicorn stays my favourite animal forever.

Believe in miracles because only so they are going to come true!

THE DELICER

The Delicer is one of the most dangerous animals that I know. It was a kind of fish, but much more dangerous.

It lived in the sea near Atlantis. It was as big as a dolphin and more beautiful than a mermaid. The Delicer was very clever, because when Atlanteans saw it they wanted to touch it, because it was very beautiful but they didn't see the big hiding teeth in the mouth of the Delicer.

So, it could bite the Atlanteans so fast that they couldn't see it. Every year it killed about 300 Atlanteans.

by Katharina Hödlmoser, 2C

The Dinopig

The Dinopig was a kind of hippopotamus. It lived in Atlantis. The Dinopig had a bigger mouth than the pig. It was very stupid because it did not know what it had to eat. It had a long tail and it was green.

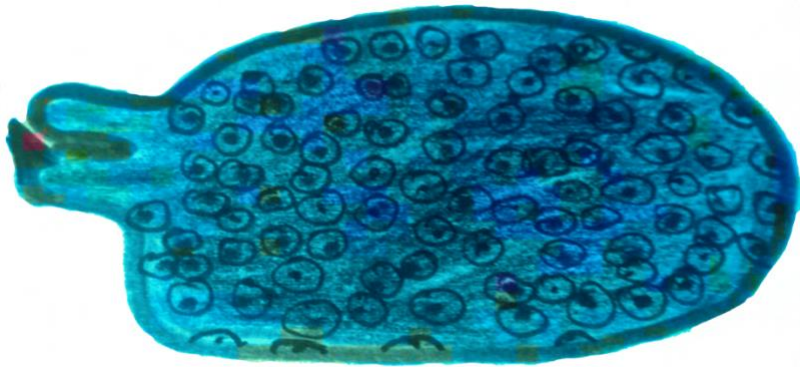

The Dinopig was as heavy as the hippopotamus. Every day, it ate a lot of plants. The Dino also ate them. It died with 100 years. It usually swam in the cold sea.

by Larissa Kreyca, 2C

Rashkeye

The Rashkeye was a kind of a shark. Its parents died when he was two years old. It lived in the sea around Atlantis.

The animal was as big as an elephant and it was very strange, because it had 500 eyes all over its body. The Rashkeye had a tiny mouth and one big tooth. It always ate fish and crabs.

The Atlanteans did not like the Rashkeye, so it was often very sad. It had no friends and no family. 😞

by Selin Karadeniz, 2C

Habbito

The Habbito was a very unusual animal, because it always bit, and the Habbito was shy, too.

The dangerous pet lived in Atlantis, deep underwater. It was as big as a bee but anyway dangerous. Its bite was poisonous! It was blue and pink striped. Habbito looked like a tiny seahorse, but with three legs.

Its favourite food were kids and ducks. Often the little animal hid behind a rock. The tiny seahorse with three legs didn't live in a swarm, that's why it was alone.

But beware! Maybe the Habbito is still alive!?

by Valentina Christian, 2C

Tigli!

The Tigli was a very dangerous and nice animal.

It was as tall as the tiger. The Tigli was nicer than a shark. It had a very friendly face. The animal lived on

an island near Atlantis with many other animals but there weren't so many Tigli because they were rare animals. All animals admired its beautiful mane and colourful

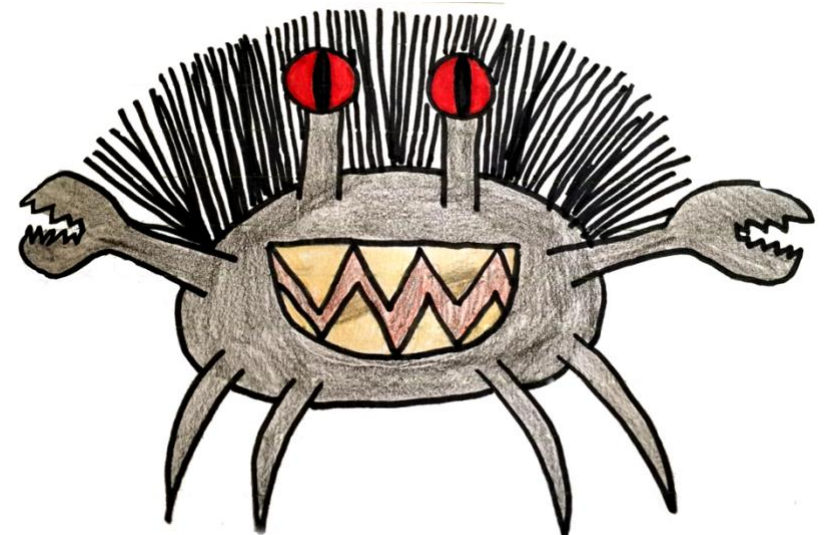

fur.

The Tigli had two wings and it could fly very well.

by Michaela Kreer, 2C

The Platon

The Platon was a mixture of a crab and a sea urchin. Normally it lived in the sea, but sometimes it left the water and visited the beach. A Platon was as big as a dolphin. It had more than 1000 spikes on its back. When you touched the spikes, you died. The Platon had eyes as red as fire. It had got black claws. The Platon was one of the most frightening animals of Atlantis.

by Romana Reiter, 2C

The Pigsnake

The Pigsnake is a very nice animal. It lives in woods, but it also lives at the top of the tree. Its enemies are the Crocodilepig and the Horsecow.

Its colours are green, pink and black. The eyes are red. The Pigsnake is as toxic as the viper but the Pigsnake is not so smart.

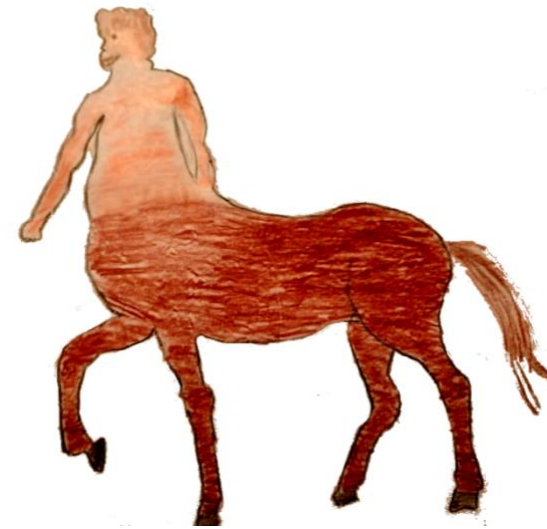

It eats insects, mice, fruits and grass. The Pigsnake very often goes booty hunting and it often plays with the animal Frida, who is a Rabbitsnake.

by Amelie Maier, 2C

The Centaurus

The Centaurus lives in Atlantis. He isn't dangerous. The animal is as big as a horse.

The Centaurus is half a horse and half a man. The

exotic animal is always male, but the long hair is very irritating. Furthermore, he is very fast, faster than a cheetah. So, he can run away from his enemies.

The Centaurus is a pack animal in Atlantis because it's very strong. Unfortunately, the animal can't speak, so it is quiet. The Centaurus is a very exotic animal.

by Simon Langedger, 2C

The Mermaid

It lives in the Atlantic Ocean. Mermaids live in deep water. They come to the water surface. Then they swim there and the sun shines on their bodies. Mermaids are half an animal and half a woman. They have very long hair. The mermaid

lives in a swarm with many other mermaids. It's as big as a woman. Many mermaids are very big and some are very small. The mermaid is smaller than an elephant but it's bigger than me. They are bigger

than a dog but smaller than a horse. They are so sweet things. I want to be a mermaid.

by Valerie Saller, 2C

THE CAIG

This animal is a cat, but it's also a pig. Many people have them for pets. Usually it is absolutely friendly, but on bad days it's more dangerous than a shark. The Caig has a huge mouth with many teeth in it. The animal is

extremely small. It's as small as a guinea pig. It has a cat's head, but a pig's tail. Sometimes it's the other way around. I like this animal, because it's very strange.

by Sarah Mayr, 2C

The Crocfish

The Crocfish was a kind of crocodile and a kind of fish. The animal had more than 3000 teeth. The Crocfish killed 400 fish every year. The animal was the worst animal in Atlantis.

The Crocfish was smaller than a rat but his bite was very toxic, you could die from it. All sea creatures were afraid of this small animal.

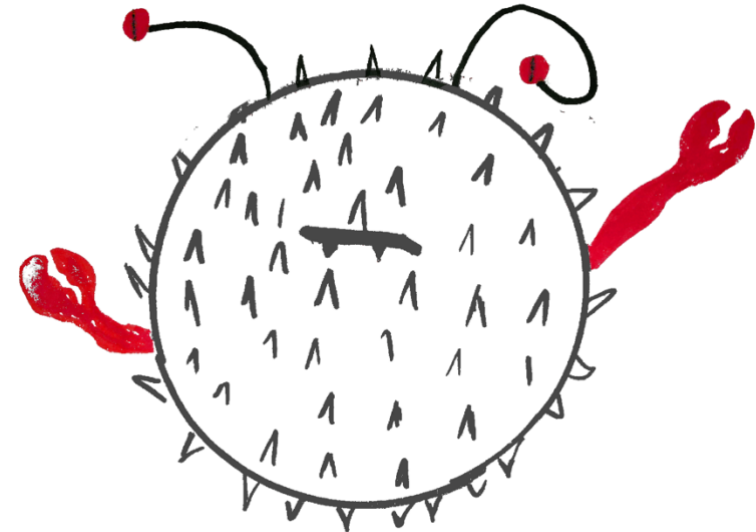

The longer he lived, the bigger he got. That's why the sea creatures were more and more afraid of him.

by Christin Fritzenwallner, 2C

The red-eyed sea urchin-crab

In the Atlantic Ocean there were many underwater animals. One was the red-eyed sea urchin-crab.

The strange animal had red eyes which could freeze people to death. A legend says that thousands of people came to

an awful death due this animal. It also had a pair of huge scissors like a crab. The terrible animal had many stings which were equipped with a deadly poison.

Scientists argue that the red-eyed sea urchin-crab extincted eighty years ago.

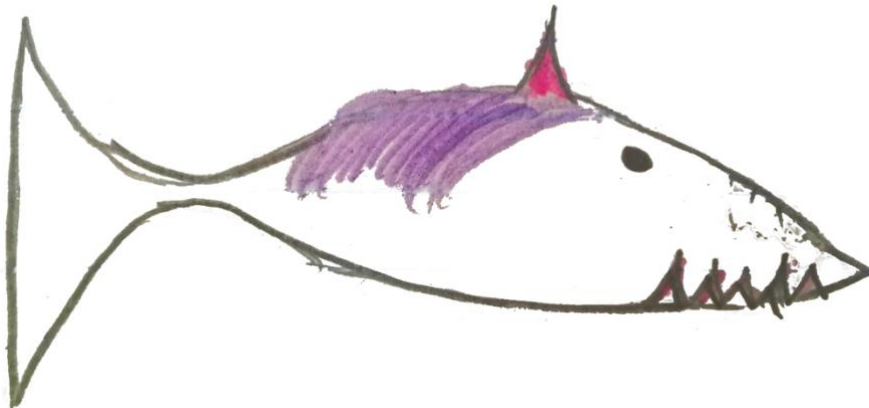

But last summer....

by Katharina Furtmüller, 2C

The creepy unicorn shark

It was a sunken city where the dreaded unicorn shark lived. It was the scariest animal anywhere around Atlantis. Pointed teeth protruded from his mouth and he had a pink horn. The most beautiful thing of the animal was the purple hair.

It lived in a very old sunken ship, but this was like home for the animal. Everyone who met it was terrified, because it

was so huge. It was bigger than a normal shark and bigger than a whale. Its favourite food was jellyfish. Nobody could escape the unicorn shark. Nobody noticed that it was actually very nice, but everyone looked at it and was already terrified. That was the unicorn shark, which had a difficult life in the sunken city.

by Elena Kreuzberger, 2C

The red shark

The red shark was a very big shark. He had ten big teeth. He was threatened with extinction, but the red shark didn't extinct. The red shark was very dangerous.

He killed you with one bite. The red shark came from Atlantis, but he could swim to the sea and.....could kill you! This animal killed everything now. He hated octopuses and crabs. The red shark ate big animals like fish from Atlantis. The red shark was very dangerous.

Please don't go to Atlantis!

by David Rohmoser, 2C

Mermaids

Mermaids live in the sea. The scary thing is they are half fish and half woman. They can be very fast. Mermaids can attract pirates with their singing and deceive them. They look very beautiful, but they are not always friendly. Nobody knows whether there still are mermaids. There are many videos on YouTube that have been recorded. But nobody knows if this is true or just fake.

by Lara Spasojevic, 2C

The Pingpong

The Pingpong was as tall as a rabbit. The animal had two legs and pink hair. On the belly he had a blue circle with flowers on it. He had long ears which were purple. The nose of the Pingpong was a blue heart. The eyes of the pet were bigger than a fish's eyes.

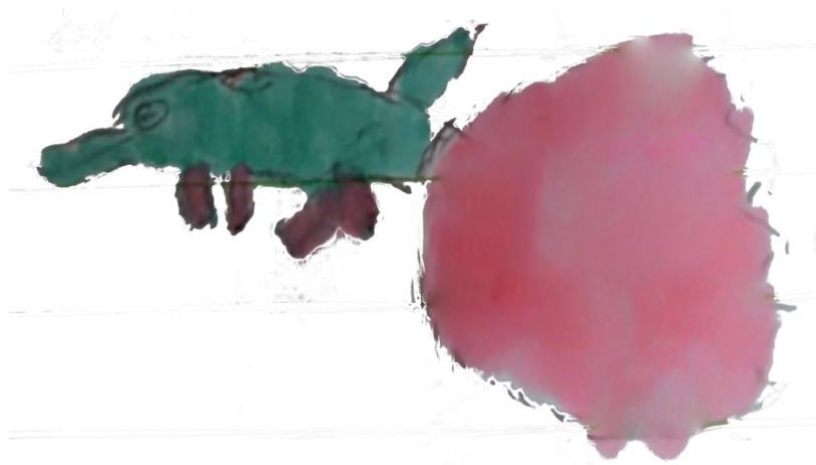

He could fly with his purple ears. But he couldn't swim. The Pingpong ate glitter in all colours. But he ate melons too. The pet slept in the night and played during the day. The animal liked to play with his colourful ball.

He wasn't dangerous and many people liked him. He was a famous pet for kids because he sometimes went to a toilet and flushed himself down. The pet did not go to school or to the kindergarden. The pet didn't have an enemy. The animal was often in the nature and picked colourful flowers. He was more often happy than a normal person. Lots of people loved him because he was so sweet and happy. He could cheer very well. I like the pet because he is sweet and often happy.

by Lisa Reich, 2C

The ballet dolphin

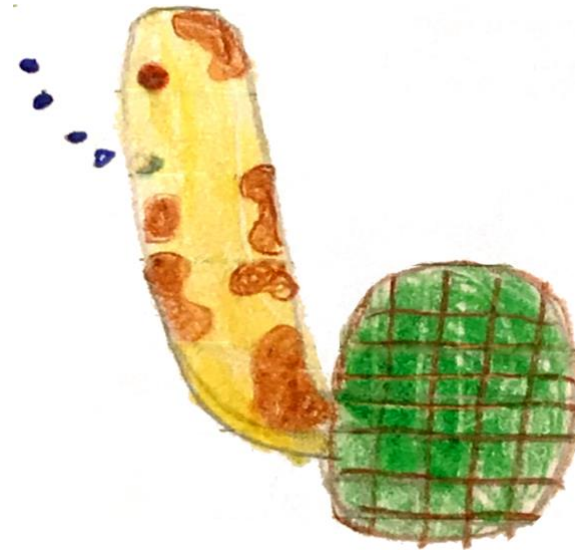

The ballet dolphin was a kind of dolphin. It lived in the sea around Atlantis. It was smaller than a shark and it was very polite and harmless. It had a very small mouth and more than 20 teeth. He danced ballet and drank shakes from the Atlantis shop „Starbucks“. The ballet dolphin liked to dance ballet for the people in Atlantis. He danced about three hours on one day. Another hobby of the ballet dolphin was singing. The animal is a friend for life.

by Anna Obermoser, 2C

The Longneckturtle

The Longneckturtle was a grandma of the giraffe. This unusual animal swam in the sea around Atlantis. When it turned its neck very fast right and left, it could swim. But it wasn't a fast swimmer.

The Longneckturtle's neck was as long as the giraffe's. When it ate a fish, the animal always lost one tooth, but the tooth grew again after one hour. The Longneckturtle had

a strong shell like a turtle. The mouth was smaller than the mouth of a cat. It wasn't very dangerous.

The swimmer loved to eat small fish in the morning, but for lunch the Longneckturtle ate a bread with a starfish on it. In the evening the animal was on diet.

by Viola Steinberger, 2C

The Teeth-Crocodile!

The Teeth Crocodile lived in the sea. It was the most dangerous animal in Atlantis.

In its mouth, the animal had bigger teeth than a shark.

But the teeth were not only in the crocodile's mouth, they were also on its back!

And the animal ate EVERYTHING.

It also ate people. It was nocturnal. I hope you'll never see this dangerous animal!

I've drawn a picture for you because you must see it!

by Nina Kreer, 2C

THE DONKYLLER

The animal which I talk about, is a donkey, but of course it's not a normal donkey. It is a Donkyller! It is bigger than a normal donkey, but smaller than an elephant. Instead of ears the donkey has big fins. Its four hoofs are as sharp as knives. With its big fins it is faster than a shark. The animal kills sea cucumbers under the water. His name is Albert and he doesn't like red sharks. Albert is more dangerous than one hundred jellyfish. But he is a loyal friend.

by Lorenzo Bonde, 2C

The Loveeagle had got the body of an eagle and a head like a heart. The bird was smaller than an eagle. It had got four arms and three legs. The feathers were brown, black and white. Therefore, the Loveeagle was more beautiful than an eagle. In his mouth the Loveeagle had got

big teeth. The animal couldn't jump, but it could fly.

It lived in a lake near Atlantis, but it had to pop up to breathe.

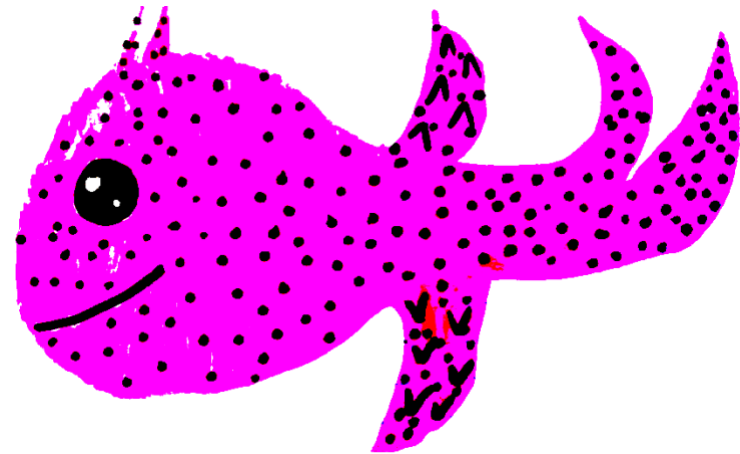

Its favourite food was a lake cucumber. His nick name was Eddie. It was a very nice animal and I want to meet it.

by Emil Zaller, 2C

The Whalebird

One day professor Mr. Clever found a new animal in the Atlantic.

It had got the shape of a whale, but the animal had two wings and two ears. Its colour was pink with black dots. The sea creature was as small as

a bird. It lived in a big shell on the bottom of the sea. The animal was very poisonous and only ate squids. It was a night animal, because it hated light. Mr. Clever thought the animal was very interesting, that's why he gave it the name Whalebird.

by Britta Pichler, 2C

The Crazy Venom Dragon

There are many dangerous animals in Atlantis. The Crazy Venom Dragon is dangerous too. He looks very stupid, but he is very poisonous and deceitful. When you are in his territory, he bites your head off. The Crazy Venom Dragon lives in caves in the woods of Atlantis. The monster is bigger than an elephant. He has got big horns on his head and is heavier than three crocodiles. His breath is so poisonous, that he can eradicate an entire field of flowers with one breath. So, stay away from him!

by Stefan Fankhauser, 2C

The Soleluna was a mixture of three kinds of animals. It was a mixture of a deer, a bird and a fish.

His head and his neck were like a deer with horns on it, which were smaller than those of a stag. The body was like a bird with fins of a big fish on it.

It lived in the sea near Atlantis. Most of the time it slept in a cave, which was in a big mountain on the ground of the sea. When Soleluna didn't sleep, the shy animal swam out of its cave for searching seaweed and special sand-grains, its preferred food.

by Helena Windhofer, 2C

Swimming bird with horns
